PROFESSIONAL SUMMARY

Backend Developer and Computer Science graduate with practical experience from a three-month, on-site internship at Decibels Dev. Independently developed and tested Python/FastAPI endpoints, collaborated with frontend developers, and worked on authentication, authorization, organization-level feature flags, database models and migrations. Familiar with Swagger/OpenAPI documentation and building database-driven application backends. Seeking a Backend Developer role.

TECHNICAL SKILLS

Backend: Python, FastAPI, Django, SQLAlchemy **| Databases:** PostgreSQL, MySQL, MongoDB

Tools: Docker, Postman, Git, GitHub, Alembic, Swagger/OpenAPI

Proficiency: Intermediate in Python, FastAPI, Django, PostgreSQL, MySQL, MongoDB, SQLAlchemy and Docker.

PROFESSIONAL EXPERIENCE

Backend Developer Intern | Decibels Dev | On-site · Bahawalpur, Pakistan · Jul 2026 – Oct 2026 (3 months)

- Independently developed backend API endpoints using Python and FastAPI, then tested endpoint behavior and responses.
- Collaborated with frontend developers to support API integration and application development.
- Implemented organization-level feature-flag functionality and worked on authentication and authorization.
- Worked with PostgreSQL database models, SQLAlchemy, Alembic migrations and backend validation.
- Documented API endpoints with Swagger/OpenAPI and used Postman for endpoint testing.
- Contributed to the backend of a complete application that remains in development and has not yet been deployed.

FEATURED PROJECT

Organization Management Platform | Internship project · In development

Contributed to a backend platform for managing organizations and suborganizations, package assignments, organization-level feature flags, users and role-based permissions. Worked on API development, authentication/authorization, database operations and validation. **Stack:** Python, FastAPI, SQLAlchemy, PostgreSQL, Docker, Alembic, Postman.
